

## Fact Sheet

# 200hp Electric Oil-Free Rental Air Compressor

### Sullair's DR 13 Oil-Free Air Compressor...

#### Performance you can trust for Critical Oil-Free Compressed Air Applications

The Sullair 200 hp DR 13 Oil-Free Air Compressor is rated for 785cfm (200hp @ 460VAC, 3 phase, 60Hz). Each unit boasts a two stage rotary screw compressor end, and an advanced, operator friendly control scheme. From instrument air to process applications, the Sullair "D" series is a staple solution for temporary oil-free compressed air users worldwide. All units in the "D" series possess the latest technologies in energy efficiency and air purity.

We also offer complete application engineering, design and installation services, along with critical support accessories, including air hoses, manifolds, electrical distribution, transformers, and electrical cable.

#### Product Benefits

- **Easy Access Control Panels** – Sullair's Statistical Process Control (SPC) system monitors rotor quality standards to assure consistent compressor performance.
- **Optimalair™ Inlet Air Filter** - The industry leading filtration technology offered exclusively by Sullair prevents contamination from entering the machine and the contamination is avoided internally by utilizing timing gears which prevents rotor contact.
- **Separate, easy-to-adjust valves**—The "D" series oil-free compressor has separate inlet and blow down valves of simple, rugged design for easy adjustment and maintenance.

#### Other Unique Benefits

- Trailer mounted if needed for easy transport.
- Premium Control Panel with LED diagnostic and system fault indicators.
- Quiet Operation suitable for the most sensitive work areas.
- Exceeds EPACT (Energy Policy Act) 1997 standard.
- Three Stage Intake Filter Providing superior filtration 99.9% efficient per SAE J726 (Society of Automotive Engineers)

### Typical Applications

#### Planned Outages:

When operations are shut down to implement improvements and perform maintenance, temporary Oil-Free Air, Power and Cooling systems can maintain utilities to critical areas of the process that must remain operational.

#### Emergency Operation:

Unforeseen events can leave critical utility systems inoperable. Complete Temporary systems can be mobilized to quickly restore operations, resulting in reduced downtime.

#### Contingency Planning:

Blue Stream can offer contingency planning services to formulate a customized emergency response procedure.

#### Applications Engineering:

Our team of experienced professionals can provide application expertise based on over 50 years experience in the temporary utility industry.

#### Customized Temporary Solutions:

No project is too large or too small. We have the capability and resources to provide temporary utility systems of virtually any size to meet your needs.

# Fact Sheet

## 200hp Electric Oil-Free Rental Air Compressor

### Equipment Description

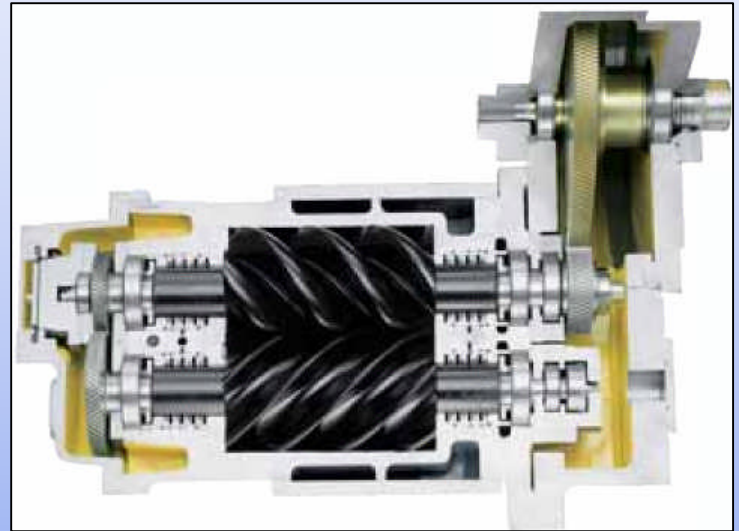

Sullair is a global leader in the design and manufacture of Oil-Free Air Compressors. The "D" series two stage, rotary screw compressor design is unmatched in performance and reliability, and offers a user friendly control interface, with easy access to perform preventive maintenance. The use of an electric compressor versus it's diesel counterpart offers a "green" solution for most compressed air needs.

### Electrical

Voltage	480 volts - 3 phase
Running Amps	240 FLA
Breaker Size	400 amps

### General

Make	Sullair
Maximum Air Output	785 cfm
Maximum Pressure	150 psi
Motor Horsepower	200
Compressor Type	Two Stage Rotary Screw

### Physical Data

Model	Sullair DR-13
Length	11.4'
Width	5.5'
Max. Height	6.5'
Weight	7,396 lbs.
Outlet Connection	2" NPT
Sound Level - dB(A)	78 @ 1 meter - 100% Load
